

OIL INTEL

QB DEGREASER WATER BASED CLEANER AND DEGREASER

QB Degreaser is an excellent degreaser and remover of oils, grease and other typical industrial-based soiling from a huge range of hard surfaces. Oils and other soiling-solids are suspended in solution until flushed into holding tanks, separator pits or settling ponds where the mixture will slowly separate to form distinct water and oil layers allowing easy removal of unwanted contamination from discharge water. Formulated as an environmentally responsible alternative to solvent based and non-biodegradable water based cleaning systems. Excellent on workshop and forecourt floors, and most machinery and heavy equipment surfaces.

Main Features & Benefits

- Cuts through grease and oils with ease
- Environmentally safe alternative to solvent based and non-biodegradable water based cleaning systems
- Multi-purpose for many surfaces, suitable for service station forecourts, workshops, plants and parts degreasing and heavy vehicle cleaning.
- No added fragrance
- Added quick-break soil releasing agents

Directions

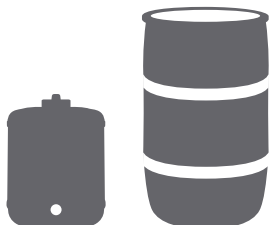

Forecourts and workshops: Apply a small amount of undiluted QB Degreaser to oil and grease spots and then scrub affected area to remove stains. For full coverage apply a 5%-20% solution to area to be cleaned, sweep or brush area and then hose off, adjusting the dilution rate further or more concentrated to suit specific circumstances. If using through a water blaster use a 5% solution applied at low pressure and remove by blasting off at high pressure with fresh water.

Plant and Machinery:

Heavy duty cleaning: use neat, spray on, agitate if required and wash off with water.

Medium-Light duty cleaning: spray on a 5%-20% solution and water blast off with fresh water.

Parts cleaning by hand: use a 25-50% solution. Rinse with water.

Product Code:

20 Litres: FC-AMTQB20

200 Litres: FC-AMTQB200
