

OIL INTEL

TRUCK WASH HEAVY DUTY CLEANER

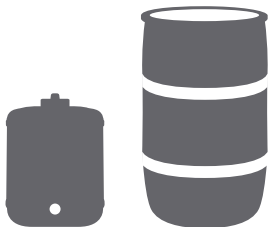

Truck Wash is a concentrated formulation designed to remove heavy road grime and dusty build-up from the exterior of commercial vehicles and trucks, under New Zealand conditions. Also suitable for a wide range of exterior commercial and industrial surfaces such as walls, roofs, and general building hard surfaces. It's non-caustic formula makes it ideal for use through automatic dilution control equipment and waterblasters. May also be used on motor vehicles. Please read precautionary measures.

Main Features & Benefits

- Unique formulation using the power of citrus solvent
- Concentrated, giving a competitive cost-per-wash
- Pleasant orange fragrance
- Also effective on a variety of exterior commercial and industrial surfaces.

Directions

When using with a water blaster, spray onto surfaces at ratio of 1:80 – 1:200 (1 ¼% to 1/2%) using a low pressure setting and allow to work on soiling for several minutes before removing thoroughly with high pressure, fresh water. If streaking occurs the product is being used at too high a concentration. Never leave to dry on surfaces, especially on glass surfaces. Particular care should be undertaken on warm days when drying can rapidly occur. Not recommended for use directly in sunlight. When using manually dilute 1:200 (1/2%) into a clean bucket and wash over surfaces, then rinse with fresh water.
